**RESPONSE TO OFFICE ACTION**

Dear Sir:

The following is in further response to the Office Action dated 08/10/2004

**AMENDMENTS TO THE CLAIMS**

1-7. (Canceled)

1            8. (Currently amended) A self-heat-conductive heat dissipating module, comprising:  
2            a plurality of heatsinks which are overlapped, said heatsinks being physically  
3            separated from each other and having a discontinuous contact interface, with each said  
4            heatsink having a plurality of fins connected to a base of said heatsink, said base also  
5            having a plurality of trenches;  
6            at least one heat convection superconductive tube containing a high temperature  
7            superconductor composite material, said superconductive tube connecting a pair of said  
8            heatsinks, said at least one superconductive tube having a first portion that is received in  
9            one of said trenches of said base of a first heatsink of said pair of heatsinks, and said at  
10           least one superconductive tube having a second portion that is received in one of said  
11           trenches of said base of a second heatsink of said pair of heatsinks, such that heat is
